Subject: Re: Aspen

Dear Yuri and Yulia

Sorry for the late response. I've got a real cold but it's over now.

We've enjoyed the weekend Very Very much. You can be really proud of your role in enabling it. Fascinating people and genuinely sincere content.

I still hope to be introduced to the fast speaking physicist Arkani-Hamed. He should be a unique person. I'm now listening to a series of popular lectures by Prof. Leonard Susskind of Stanford on Strings, Super Symmetry and M-theory and reading a Brian Greene book on the same subject. You feel compelled to admire people like Nima, who can blaze new trails in such a domain.

Looking forward for next year's Weekend.

Hope we can meet even before when we are in the US or if you happen to come to Israel.

Thank you for initiating my participation.

N.B. Chevrolet Camaro convertible is a good one for "race driving 101".

Best

Ehud Barak
